QUESTION

In 1958, economist Bill Phillips introduced his Phillips Curve, which established a relationship between lowering unemployment and increasing wages in an economy.

This was challenged by Milton Friedman in the 1960s, who predicted that attempting to lower unemployment via expansionary policy would only cause inflation to accelerate.

Which economic situation, first seen in the world in the US following the 1973 oil crisis, validated Friedman's argument?

11

ANSWER

Stagflation

An economic cycle marked by slow growth, high unemployment and high inflation all at once.

QUESTION

The term gives us **mortgage**, literally a "dead pledge" — the pledge dies once the debt is paid off. The same root gives us a second financial term, which entered English in the 14th century meaning "to kill off." Today it describes two things: repaying a loan in instalments of principal and interest until the balance is extinguished, and writing down the cost of intangible assets like patents and copyrights over their useful life.

Which term?

19

ANSWER

Amortisation

Applies to intangible assets and loans: it spreads the cost of patents and copyrights over the asset's useful life, and for loans it means repaying in full through monthly payments of principal and interest.
